TomTom and BMW Motorrad Provide In-Bike Navigation via App

EICMA, Milan, Italy, November 6, 2018 TomTom ([TOM2](#)) today announced that BMW Motorrad owners can now experience the best of TomTom navigation for motorcyclists running on the BMW Motorrad Connected app. The smartphone app stays safely in the rider's pocket, while visual directions are shown on the bike's integrated handlebar display. Audio directions are provided via Bluetooth® into the rider's compatible helmet.

Features have been motorcycle-optimized, with one of the most requested – the option to choose winding routes – being introduced.

The new functionality is available from today, with app users needing only to update their app, free of charge, before their next ride.

Antoine Saucier, Managing Director, TomTom Automotive, said: "The combination of TomTom's maps, software and services provides a fantastic motorbike navigation experience for BMW Motorrad riders."

TomTom's navigation components are provided to BMW Motorrad via TomTom's Navigation software, NavKit, alongside TomTom's NDS maps, and services including TomTom Traffic, weather and Speed cameras.

TomTom is at EICMA 2018 – Pavilion 13, Booth N72.

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by TomTom is under license. Other trademarks and trade names are those of their respective owners.
