TomTom Telematics named Europe's largest provider of fleet management solutions for fourth year running

November 13, 2018

Amsterdam, The Netherlands, 13 November 2018 – Market analyst firm, Berg Insight, has recognized TomTom Telematics as the largest provider of fleet management solutions in Europe for the fourth successive year.

The 13th edition of Berg Insight's *Fleet Management in Europe* report estimates that the overall market penetration of fleet management systems in active use will double over the coming five years, from 15% in 2017 to 28.8% by 2022.

"When we started with WEBFLEET almost 20 years ago, few of our customer had heard about fleet management and its benefits. Our SaaS fleet management solution WEBFLEET is now integrated into our customers' operations processes – helping them to reduce fuel costs, increase productivity, and get more jobs done every day", said Thomas Schmidt, Managing Director of TomTom Telematics.

"TomTom WEBFLEET has seen multiple make-overs throughout its lifetime, which allowed us to grow to where we are today. Through continuous innovation, we've shaped fleet management in Europe, and we're committed to further develop the market", added Schmidt.

About TomTom Telematics

 TomTom Telematics is a Business Unit of TomTom dedicated to fleet management, vehicle telematics and connected car services. WEBFLEET is a Software-as-a-Service solution, used by small to large businesses to improve vehicle performance, save fuel, support drivers and increase overall fleet efficiency. In addition, TomTom Telematics provides services for the insurance, rental and leasing industries, car importers and companies that address businesses as well as consumers. TomTom Telematics is one of the world's leading telematics solution providers with more than 861.000 connected cars worldwide. The company services drivers in more than 60 countries, giving them the industry's strongest local support network and widest range of sector-specific third-party applications and integrations. Our customers benefit every day from the high standards of confidentiality, integrity and availability of our ISO/IEC 27001:2013 certified service, re-audited in November 2017.
