

TomTom Selects ChargeHub To Provide Electrical Vehicle Charging Station Information for its Maps

October 17, 2019

Reaches milestone of more than 300,000 charging stations

ITS World Congress, Singapore, October 17, 2019 Location technology specialist, TomTom ([TOM2](#)), today announced an agreement with ChargeHub, a leading aggregator and digital platform for public electrical vehicle charging stations (EVS). ChargeHub will provide TomTom with access to one of the largest databases of public charging stations in North America, bringing the total global number of charging stations integrated with TomTom's maps to more than 300,000*.

"By integrating ChargeHub's EVS data into our maps and EV Service, TomTom helps drivers to quickly and easily search and navigate to charging stations, saving time and reducing range anxiety.", said Antoine Saucier, Managing Director, TomTom Automotive. "It's a great example of how we're removing barriers to widespread adoption of electric vehicles as we push towards our vision of a world free of emissions."

"By working with TomTom, we are ensuring that the most complete and accurate information relating to charging becomes more widely available," said Simon Ouellette, Co-Founder and President of ChargeHub. "We believe that this will bring more visibility to the EV infrastructure and help accelerate the transition to electric mobility."

TomTom's maps and EV Service include global coverage and provide real-time availability information to reassure drivers during their search for charging stations. This product is available to TomTom's Automotive and Enterprise customers in a variety of delivery formats.
