TomTom Connected Navigation Chosen by Volvo Trucks

Paris Motor Show, 29 September 2016 – TomTom ([TOM2](#)) announced today that it has been selected by Volvo Trucks as a connected navigation supplier for their new infotainment platform, launching first in Europe in 2017, with other regions to follow at a later time.

With this agreement between TomTom and Volvo Trucks, TomTom provides its innovative and modular navigation software, NavKit, in a customised version for truckers; automotive grade digital maps; and live TomTom Traffic service. It marks the first time that TomTom and Volvo Trucks are working together.

TomTom is delighted to be working with Volvo Trucks, one of the largest heavy-duty truck brands in the world," said Antoine Lucier, Managing Director TomTom Automotive. "We look forward to delivering our industry-leading products to Volvo Trucks' professional and demanding customers."
